

1. Core Modules & Features

To-Do Section (Inspired by Todoist)

- Clean, minimalistic task list.
 - Users can add one-time or recurring to-dos.
 - Tasks can be:
 - Linked to habit groups OR
 - Added independently (e.g., "Submit assignment by Wednesday").
-

2. Category-Based Habit Creation & Tracking

Habit Groups

- Users can create categories like:
 - Fitness
 - Mindset
 - Career
 - Study
 - Personal Development

Sub-Habits (Tasks Within a Habit Group)

- Each group can have multiple sub-habits/tasks.
- Example:
 - *Gym Habit*: "Hit the gym", "Do 20 pushups", "Cardio 15 mins".
- Users can:

- Assign points (Positive, Negative, Neutral)
 - Use Emojis or Icons
 - Choose a color theme for the group
-

3. Customizable Streak Rules

- Users define what counts toward streaks:
 - Complete **all** tasks
 - Complete **specific ones only** (e.g., just “Hit Gym” keeps streak)
 - Complete **at least 1 out of many**
 - Users can:
 - Keep same checklist daily
 - Customize checklist day-wise
 - Leave some days blank intentionally
-

4. Gamified Experience

XP & Leveling System

- Completing habits adds XP.
- Users level up over time.
- Rewards can include:
 - New UI themes
 - Stickers or icons
 - Motivational cards/quotes

Streaks & Forgiveness

- Missed streaks can be saved using:
 - Weekly forgiveness tokens
 - Points earned from consistency
-

5. Visual Progress Tracking

Stats & Weekly Reviews

- Show habits completed, streaks held, XP earned.
- Analytics on:
 - Most consistent habits
 - Streaks maintained or broken

Calendar Heatmaps / Graphs

- Red = Missed
 - Yellow = Partial
 - Green = Completed
-

6. Smart Habits & Suggestions

Habit Templates Library

- Prebuilt collections:
 - Morning Routine
 - Deep Work Day
 - Social Detox
 - Discipline 101

Reminders & Nudges

- Smart reminders based on:
 - Time of day
 - Location
 - Habit stacking
-

7. Independent Habit Entries (Ad-hoc Tasks)

- Users can add to-dos outside of habit groups.
 - Example: “Submit assignment on Wednesday”.
 - One-time or deadline-based.
 - Appears in general to-do list.
-

8. Customization & Aesthetic Control

- Full dark mode support.
 - Purplish-grape color theme with complementary tones.
 - Emoji/icon assignment per habit group.
-

9. Community & Social Features

Shared Habit Groups

- Users can share habit templates with others.
- Example: A **gym trainer** creates a habit group and shares it with students.
- Students can **import/copy** habits to their dashboard.

Leaderboards

- Habit groups (e.g., Gym, Reading, Meditation) can have community spaces.
- Users in the same group can:
 - Track progress together
 - See top performers (XP-based ranking)
 - Encourage accountability and motivation

Community Interaction

- Users can:
 - Comment or leave motivational notes on group pages
 - Join public or invite-only habit communities

Habit Buddy System

- Users can team up with a habit buddy.
- Features include:
 - Mutual tracking and motivation
 - Shared goals or streaks
 - Habit reminders to one another

10. Time Box Feature

Time Blocking for Productivity

- Users can allocate specific time blocks for tasks or habits.
- Drag-and-drop time slots in a calendar-style layout.
- Visual planner to see day/week view.
- Helps users:
 - Prioritize deep work
 - Avoid task overload
 - Maintain a focused schedule
- Features include:
 - Smart conflict detection (overlapping blocks)
 - Integration with reminders & notifications

- Auto-suggest time blocks based on habit data
